

GABLS1: evolution

— WENO9 / no SGS - - WENO9 / Smagorinsky --- Same-grid archive median
- - WENO5 / no SGS Same-grid archive min-max (≥ 2 members) ... 1.0 m archive median (fixed reference)

Breeze: instantaneous 60 s samples. Archive series interpolated to common times without extrapolation; model membership varies.
 h = height of 5% total surface stress / 0.95; invalid crossings omitted. Black dots: fixed 1.0 m median. Heat flux is upward positive.
